

Gynecology. Now modern.

From Concept to Global Impact:
The ASPIVIX Journey

Transforming gynecological care
through innovation

Julien FINCI and Mathieu HORRAS, Founders

25th June 2025

The Status Quo in Gynecological Care

Tools frozen in time

Tenaculum unchanged for centuries

Normalized discomfort

Pain accepted as inevitable

Critical clinical unmet need

Women deserve better options

Obstetrics

Gynecology

A spark of innovation

Identifying and validating the gap

Women's health tools neglected

Envisioning alternative

Gentler approach to cervical stabilization

IP & Incorporation ASPIVIX

Mission: improve care for millions of women

Facing the Hurdles

Resistance to change

Conservative field, entrenched practices

Technical challenges

New approach required innovative engineering

Funding barriers

Convincing investors in women's health

Regulatory & Reimbursement complexity

Navigating approval pathways (CE / FDA)

Founders

Complementary leadership

Engineers

Technical expertise

RAQA & Clinicians

Medical insight

Advisors

Strategic guidance

Gynecology.
Now modern.

Building the right team but also the right board and values

From Idea to Device

1

Initial concept

Sketches and early designs

2

Prototyping

Trial and error refinement

3

Testing / Clinical validation

Rigorous validation

4

Carevix® emerges

Gentle, precise, effective

Validating the Vision

- **Clinical evidence confirmed**
 - pain reduction up to 73%
 - bleeding reduction 83%
- **Trusted institutions & clinicians backed Carevix®**
- **CE Mark, FDA Cleared, ANVISA approved**
- **Strategic alliance with Bayer Switzerland & Israel elevated credibility and reach**

Success and Recognition

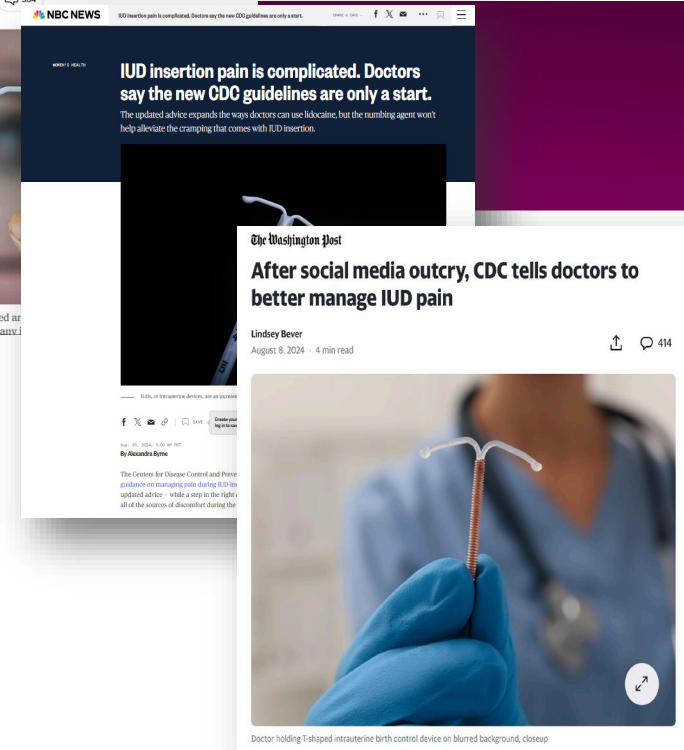

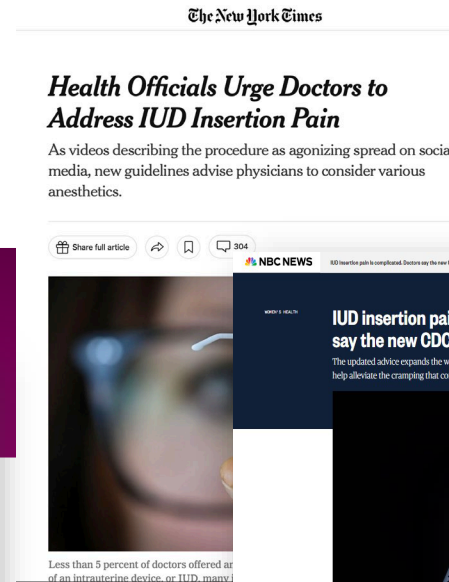

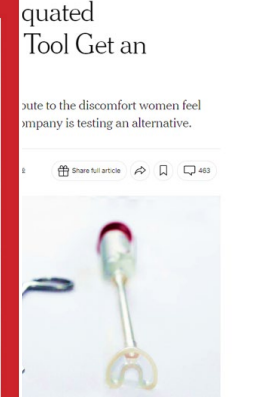

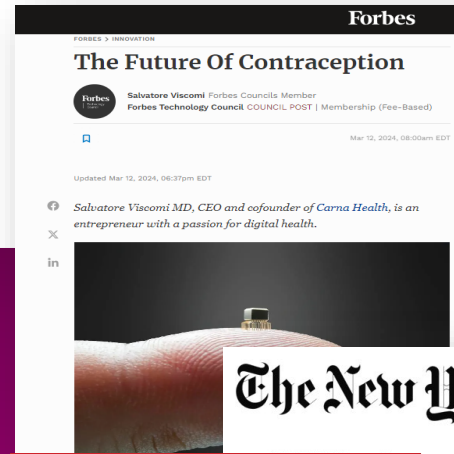

ANNOUNCEMENT

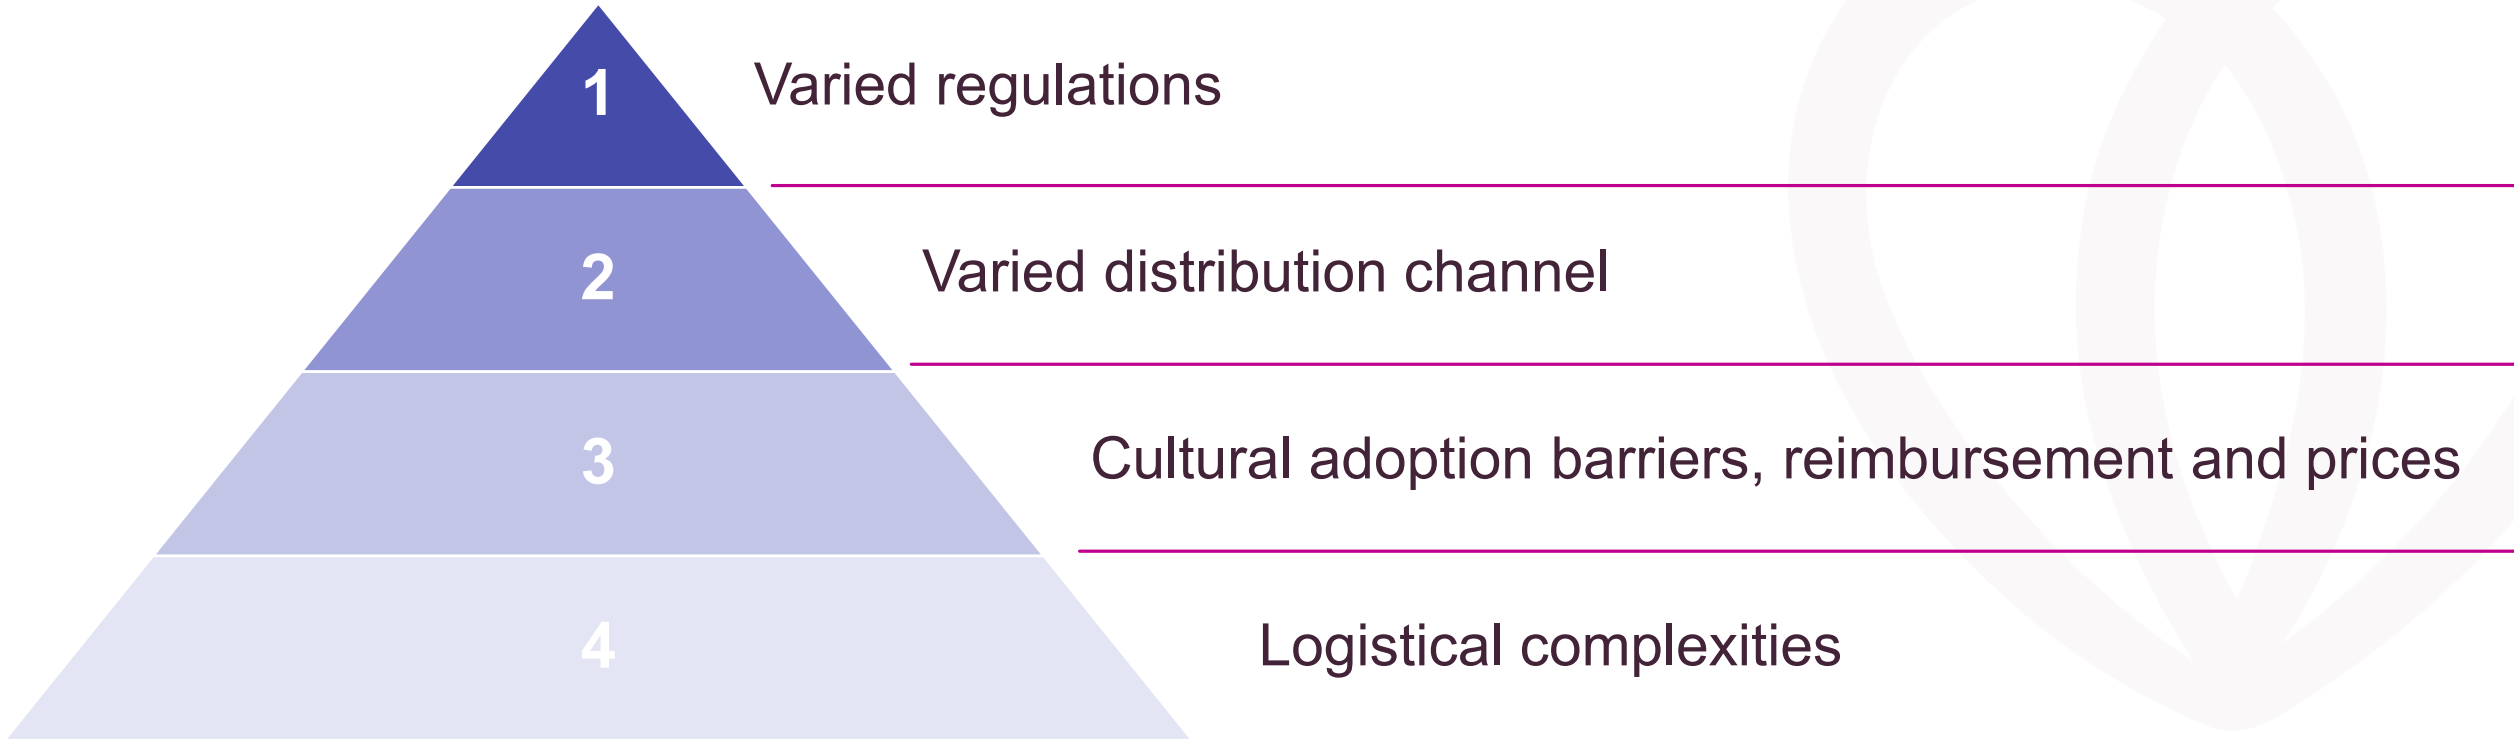

ASPIVIX announces a growth partnering with Bayer (Schweiz) AG in Switzerland to access more gentle contraceptive care

The Global Challenge

Focus and adaptability are critical

Scaling with purpose

Future Focus

Clinical engagement

Building adoption

International expansion

Reaching more markets

Product refinement

Continuous improvement /2nd generation

Our mission remains: gentler, patient-centered care for women worldwide

Transforming the standard

- 1 — Carevix® redefines the approach to gynecological procedures
- 2 — Patients report reduced pain and anxiety.
- 3 — Clinicians appreciate precision and improved outcomes.
- 4 — ASPIVIX becomes a symbol of compassionate innovation.

From Switzerland to the World

ASPIVIX brings innovation and empathy to global healthcare.

A Swiss startup proving Medtech can be human-centered.

Carevix® inspires rethinking of outdated medical tools.

The journey becomes a roadmap for future pioneers.

Thank you for joining us in this journey of innovation and impact.
